

Jinwei Liu

Ph.D. Student in Control Science and Engineering

📍 Hefei, China ✉ liujinweishandong@outlook.com 🌐 jinwei-liu.github.io 👤 Jinwei-Liu

Profile

- Ph.D. student in Control Science and Engineering at the University of Science and Technology of China, after transferring from the M.Eng. program into a combined graduate-doctoral track.
- Research interests include human-machine hybrid intelligence, human-robot interaction, shared autonomy, and embodied intelligence.
- Current work focuses on shared control, teleoperation, reinforcement learning, and human-in-the-loop reinforcement learning.
- Interested in both human-to-machine intent communication and machine-to-human information expression.

Experience

Dobot, Embodied Intelligence Algorithm Intern Shanghai, China
 • Developing embodied intelligence algorithms for robotic systems. June 2026 – present
 • Working on human-in-the-loop reinforcement learning and adaptive embodied agents. 1 month

Education

Doc- University of Science and Technology of China, Control Science and Engineering Hefei, China
tor of • Combined graduate-doctoral track after master's-to-doctoral transfer June 2026 – present

**Phi-
loso-
phy**

Mas- University of Science and Technology of China, Artificial Intelligence Hefei, China
ter of • Weighted average: 91.09; GPA: 3.99/4.3 Sept 2024 – June 2026

**Engi-
neer-
ing**

Bach- Ocean University of China, Automation Qingdao, China
elor of • Rank: 1/89; Weighted average: 92.42; GPA: 3.82/4.0 Sept 2020 – June 2024

**Engi- • Honors: National Scholarship (twice); Honorary Bachelor's Degree of Ocean Uni-
neer- versity of China

Publications

Delay-Aware Shared Control for Teleoperation Systems: Intent Trajectory Prediction 2026
Under Communication Latency

Journal article on delay-aware shared control for teleoperation systems, using DA-RT to predict operator intent under communication latency.

Jinwei Liu, Pengfei Li, Yaqing Zhou, Tao Wang, Yu Kang, Yun-Bo Zhao

ieeexplore.ieee.org/document/11535330

LSTM-MPC: Physically Feasible and Interpretable Trajectory Prediction 2026

Accepted paper on physically feasible and interpretable trajectory prediction via latent MPC parameter estimation.

Jinwei Liu, Pengfei Li, Qianqian Zhang

Human-AI Shared Control via Motor Knowledge Neuron Stimulation

2026

Accepted paper on human-AI shared control through distributed motor knowledge neuron assemblies.

Jinwei Liu, Pengfei Li, Sibin Huang, Yun-Bo Zhao, Yu Kang
