

Jinwei Liu

M.Eng. Student in Human-Robot Shared Autonomy

 Hefei, China  liujinweishandong@outlook.com  [jinwei-liu.github.io](https://github.com/jinwei-liu)  Jinwei-Liu

Profile

- Research interests include human-machine hybrid intelligence, human-robot interaction, and shared autonomy.
- Current work focuses on shared control, teleoperation, and reinforcement learning.
- Interested in both human-to-machine intent communication and machine-to-human information expression.

Education

Master of Engineering **University of Science and Technology of China**, Artificial Intelligence Hefei, China
• Weighted average: 91.09; GPA: 3.99/4.3 Sept 2024 – present

Bachelor of Engineering **Ocean University of China**, Automation Qingdao, China
• Rank: 1/89; Weighted average: 92.42; GPA: 3.82/4.0 Sept 2020 – June 2024
• Honors: National Scholarship (twice); Honorary Bachelor's Degree of Ocean University of China

Publications

LSTM-MPC: Physically Feasible and Interpretable Trajectory Prediction 2026
Accepted paper on physically feasible and interpretable trajectory prediction via latent MPC parameter estimation.
Jinwei Liu, Pengfei Li, Qianqian Zhang

Human-AI Shared Control via Motor Knowledge Neuron Stimulation 2026
Accepted paper on human-AI shared control through distributed motor knowledge neuron assemblies.
Jinwei Liu, Pengfei Li, Sibin Huang, Yun-Bo Zhao, Yu Kang
